Application: 10Pearls Univeristy			**Site URL:** https://10pearlsuniversity.org/user-account/																										
TC_01	Mobile App	Sign in	Verify user can login with correct credentials.	When attempting to log in using a valid email and password, the app displays an error message: "**Missing parameter(s): login, password**"	User should be successfully logged in and redirected to the home screen.	Fail	Functional	High	Critical	Flutter (Mobile Frontend), Laravel (Backend)	Sign in with valid credentials.mp4	Imran Ali	17/06/2026																
TC_02	Website	Sign in	Verify that the password field on the Sign In page displays a show/hide password icon, allowing users to toggle password visibility while typing.	The show/hide password **icon is missing**, so users cannot toggle password visibility.	The password field should have a show/hide password icon (eye icon) to allow users to view or hide their password while typing.	Fail	UI, UX	Medium	Low	React (Web Frontend)	Password Icon. JPG	Imran Ali	17/06/2026																
Application: Simplilearn			**Site URL:** https://accountsv2.simplilearn.com/auth/login																										
TC_01	Mobile App Website	Course Content	Verify that the "**Self Learning**" tab displays the course content correctly for the course "**Software Testing and Documentation using Gen AI**" without showing any error on both mobile app and website.	When opened the Self Learning tab on mobile app, the screen displays: **Error** **Something went wrong. Try again** And when opened the Self Learning tab on website, no error message is displayed, but **the screen remains blank,** i.e. the course content is not displayed.	The Self Learning tab should load and display the course content (videos, text, quizzes, or modules) properly without any error.	Fail	UI, Functional	High	Critical	Flutter (Mobile Frontend), React (Web Frontend), Laravel (Backend)	Content on Mobile app.png Content on Website.jpg	Imran Ali	17/06/2026																
TC_02	Mobile App	Platform Detail	Verify that the "**Reviews section"** shows correctly without UI misalignment, including platform logo, platform name, Write a Review button, ratings and number of reviews.	The platform logo, platform name, "Write a Review" button, ratings and number of reviews are visible, but the **placement is broken**. UI elements are misaligned or overlapping on all mobile devices.	All elements — platform logo, platform name, "Write a Review" button, ratings, and number of reviews — should be **correctly aligned** and **consistently displayed** on all devices without overlapping or layout issues.	Fail	UI	Medium	High	Flutter (Mobile Frontend)	Reviews section. mp4	Imran Ali	17/06/2026																
TC_03	Mobile App	Upgrade Account	Verify that the "**EXPLORE CURRICULUM**" button is fully visible and properly aligned on all devices.	The "**EXPLORE CURRICULUM**" button is partially hidden at the bottom of the screen, and the page cannot be scrolled upward to view the complete button. As a result, the button is not fully visible and appears cut off on the Infinix Note 30 Android device.	The "**EXPLORE CURRICULUM**" button should be fully visible, properly aligned, and accessible without being cut off from the bottom.	Fail	Compatibility	Low	Low	Flutter (Mobile Frontend)	Explore Curriculum button.mp4	Imran Ali	17/06/2026																
TC_04	Mobile App	Certification Detail	Verify that the "**Watch Intro**" **thumbnail** is displayed correctly on the page.	The **thumbnail image is not loading** and a broken image icon with "watch intro" text is displayed.	The Watch Intro thumbnail should load properly and display the correct thumbnail without showing a broken image icon or alt text.	Fail	UI, Functional	Medium	Medium	Flutter (Mobile Frontend)	Thumbnail Image.mp4	Imran Ali	17/06/2026																
Application: Swag Labs			**Site URL:** https://www.saucedemo.com/																										
TC_01	Website	Sign in	Verify that error messages displayed are fully visible and not hidden at the top or bottom of the container.	The error message is partially hidden at the top and bottom	The **error message should be fully visible** and text should not be hidden at the top or bottom.	Fail	UI	Medium	Medium	React (Web Frontend)	Error Messae Display.JPG	Imran Ali	17/06/2026																
TC_02	Website	Products	Verify **Add to Cart** and **Remove** buttons on Products page are working.	When the website is opened, three products are already added to the cart **by default**. These products cannot be removed directly from the All Products page. To remove them, the user has to navigate to the Cart page and remove them from there. After removing the products from the cart and returning to the Products page, the **same three products** can again be added to the cart, while other products cannot be added to the cart.	• Clicking **Add to Cart** should add the product to the cart and update the cart count. • Clicking **Remove** should remove the product from the cart and update the cart count.	Fail	Functional	High	Critical	React (Web Frontend)	https://recordly.pf.com.pk/video/public/089cv6936628121772819315683480263781.mp4	Imran Ali	17/06/2026																
TC_03	Website	Products	Verify that product images match the product name and description.	The product images displayed on the Products page appear to be **dummy images**. The images do not match the product name and description, and the same image is displayed for all products.	Each product should display a unique image that accurately represents the product name and description.	Fail	Functional	High	Critical	React (Web Frontend)	Dummy Images. JPG	Imran Ali	17/06/2026																
TC_04	Website	Products	Verify that **product details** remain consistent when switching between product listing page and product detail page.	Currently, when a product is opened, a different product image, name, description, and price are displayed, which do not match the product shown on the listing page.	When a user clicks on a product from the Products listing page, the product details displayed on the product detail page should match the product shown in the listing.	Fail	UX, Functional	High	Critical	React (Web Frontend)	https://recordly.pf.com.pk/video/public/0ef8f6293034921772820459424605212746.mp4	Imran Ali	17/06/2026																
TC_05	Website	Cart	Verify cursor changes to **hand/pointer** when hovering over the cart icon.	Hovering over the cart icon does not change the cursor; it remains the default arrow.	On hover, the cursor should change to a hand/pointer, indicating the cart icon is clickable.	Fail	UX, Functional	Medium	Low	React (Web Frontend)	https://recordly.pf.com.pk/video/public/9riajl6391714941772790344344571362815.mp4	Imran Ali	17/06/2026																
TC_06	Website	Cart	Verify that when a product is added to the cart, its **name, description, quantity, price** and **image** is displayed correctly in the cart.	When a product is added to the cart, the product name, description, quantity, and price are displayed correctly, but the **product image** is not displayed.	The product added to the cart should display the product image alongside its name, description, quantity, and price.	Fail	UI, Functional	High	Medium	React (Web Frontend)	https://recordly.pf.com.pk/video/public/jmqro3677129891772788906770442690458.mp4	Imran Ali	17/06/2026																
TC_07	Website	Cart	Verify that **product quantity** in the cart can be modified.	The quantity is displayed in the cart but no option is provided to increase or decrease it.	• Each product in the cart should have a visible and functional option to increase or decrease the quantity (e.g., + / – buttons). • Updating the quantity should update the total price accordingly.		UX, Suggestion	Medium	Medium	React (Web Frontend), Laravel (Backend)	https://recordly.pf.com.pk/video/public/f71y618467281717727896431008561784.mp4	Imran Ali	17/06/2026																
TC_08	Website	Place Order	Verify that user cannot place an **order without selecting any items**.	clicking the **Checkout** button allows the user to place order even if no products have been added to the cart.	When the cart is empty, the Checkout button should either be disabled or the system should display an error message prompting the user to add items before proceeding.	Fail	Functional	High	High	React (Web Frontend), Laravel (Backend)	https://recordly.pf.com.pk/video/public/6ip3w7496299791772791490664942534527.mp4	Imran Ali	17/06/2026																
TC_09	Website	Place Order	Ensure that when a user places an order, the system collects **full delivery information**, including name, postal code, street address, city, state, and country.	Currently, the system only asks for the user's name and postal code during order placement, and **does not prompt for the complete delivery address (street, city, state, country)** where the order should be delivered.	The system should prompt the user for full delivery details, including name, postal code, street address, city, state, and country.	Fail	UI, Functional	High	High	React (Web Frontend)	https://recordly.pf.com.pk/video/public/i8uam7977923001772791399784864356494.mp4	Imran Ali	17/06/2026																
TC_10	Website	Orders History	Verify that after placing an order, the user has a way to view order details later.	Currently, the details are only shown during/just after placing the order, and there is no persistent option to view them afterward.	Users should have access to an "**Order History**" section where they can check the details of all their past orders at any time.		UX, Suggestion	High	Medium	React (Web Frontend)	https://recordly.pf.com.pk/video/public/ql40n5777289591772790868623396929554.mp4	Imran Ali	17/06/2026																
TC_11	Website	About	Verify that the **About link** opens the correct page	However, instead of loading the page, a **404 - Page Not Found** error is displayed.	Clicking on About should open the About page and show relevant information about the application.	Fail	Functional	Medium	Medium	React (Web Frontend)	https://www.loom.com/share/4b606525c68a4a6290b541f48bcd5889	Imran Ali	17/06/2026																
TC_12	Website	Privacy Policy, Terms and Conditions	Verify that the "**Privacy Policy**" and "**Terms of Service**" texts are links and navigating them opens the correct pages.	The "**Privacy Policy**" and "**Terms of Service**" are displayed as plain text. Hovering over them changes the cursor to a text selector rather than a pointer/hand cursor, and clicking on them does not navigate to any page. They are not functioning as links.	• Both "**Privacy Policy**" and "**Terms of Service**" should be clickable links. • Clicking each should open the correct page in the same tab.	Fail	UI, Functional	High	Medium	React (Web Frontend)	https://recordly.pf.com.pk/video/public/9zcqo9264114291772785779058797781937.mp4	Imran Ali	17/06/2026																
TC_13	Website	Entire Application	Verify **API integration** is complete across all modules of the application.	None of the modules are connected to APIs. Actions only trigger frontend validations. No real data is fetched, submitted, or updated.	All modules should be integrated with the backend APIs.	Fail	Functional	High	Critical	React (Web Frontend)	https://recordly.pf.com.pk/video/public/idhe38931273441772793969724429626247.mp4	Imran Ali	17/06/2026																
TC_14	Website	Entire Application	Verify the response time of buttons across the application.	The application is experiencing slow response time across multiple pages. When users click different buttons such as **Login, Back to Products,** or **All Items** from the sidebar, the system takes a noticeable amount of time to respond. This indicates an overall performance issue in the application.	Buttons should respond immediately or within an acceptable response time (usually 1–2 seconds) and navigate to the respective pages smoothly.	Fail	UX, Performance	High	High	React (Web Frontend)	https://recordly.pf.com.pk/video/public/asehj9428197551772820918749649549866.mp4	Imran Ali	17/06/2026
